

Accelero is the No. 1 for Regulatory ATMP Development in the German Capital Region

Accelero Bioanalytics GmbH is a privately financed, sustainably growing biotechnology team offering bioanalytical contract research for innovative biotech and pharmaceutical customers. Accelero supports the drug development of its internationally active clients from the pre-clinical stage to clinical development.

Accelero's biosafety level S2 laboratories in Berlin Adlershof are certified according to the principles of Good Laboratory Practice (GLP) and operate in compliance with ICH Good Clinical Practice (GCP). Accelero serves its clients with GLP seminars, training courses, and audits.

For the constantly growing number of exciting research projects, we are looking for support for our GLP test laboratory in Berlin Adlershof.

Accelero would like to invite you becoming our next

GLP / GCLP Study Director PCR-Based Studies

Reference #00031

You are the ideal Accelero team member if you...

- Hold a master's degree or a PhD in natural science or in a comparable professional field. Laboratory experience is obligatory.
- Have a strong background and proven hands-on experience in the development, optimization, and validation of PCR-based test methods (96-well or 384-well assay format).
- Develop test methods by yourself, do not hesitate to process biological materials of any kind, and work hand in hand with the lab technicians.
- Have German language skills beginning at least on the C1 level (Upper Intermediate).
- Prepare study plans, work instructions, standard operating procedures, and study reports (in both German and English).
- Enjoy direct communication with Accelero's international customers, and the service-oriented support of customer projects including their documentation (in English).
- Have an attentive and accurate way of working with strong focus on client milestones.
- Actively want to participate in Accelero's team activities, show contribution to the company's business model and initiate new ideas at all levels.

You will closely cooperate with our quality assurance and coordinate your activities with the team.

- Practical experience in HEK-293 or A549 cell-hosted virus propagation is of advantage.

Accelero stands for ...

- Family-friendly, flexible working without core working hours and time recording, including home office.
- Special leave on Christmas and New Year's Day.
- Company pension scheme as a salary conversion.
- A relaxed and pleasant working atmosphere.
- Various customer projects, boredom was yesterday.
- Intensive training in GLP as well as GCLP regulations, team workshop in English.
- Transparent corporate communication.

Accelero truly manages to work as a team, we work hand in hand to provide our customers the best possible solutions for their requirements. Accelero is not an ordinary employer and does not encourage hierarchies. We do not need investors to grow fast but create long-term and sustainable job positions by positive cash flow.

The position is available with immediate effect.

We imagine a weekly working time of at least 30 to a maximum of 40 hours.

Would you like to join our team?

You are welcome to send your application via email to lange@accelero-bioanalytics.com.

We are looking forward to meeting you soon!
